The Plan to Control You

When the Planet Executive, realised that The People, were happy and free. While they, were miserable, and trapped in a Control Matrix.

A Control Matrix, of their own creation, which they spent all their lives controlling.

They asked Big Tech, for help, to build an Artificial Intelligence, (A.I.).

An automatic people control system. Like Skynet.

On a cost based analysis, the plan to control you, and everyone on the planet, costs nothing. This is because, the crooks in control, long ago, figured out how to drain Taxpayers money, from the Western governments..

They also have their own banking system, which prints money on a computer, to give them more, unlimited funds.

Being Satanists, they had no problems with things like morality and world laws, because Corporations and the Rich, are all above the law.

So basically, this is a win win situation, where failure isn't a possible option.

Or is it?

Here are a few problems, which they don't seem to have overcome.

In a world run by crime cartels, the richest people, are the most dangerous psychopaths. The people who will do anything, to make more money, and get more control.

While psychopaths, may be very capable at murdering their opponents, they are not that good at planning.

And, as they have a large part of their brain missing, they fail miserably at people skills.

So when they said to the Big Tech industries, we want a system, to track, trace and control, every person on the planet, the salesmen lied, and said they could do it.

For some reason, they seem to have based this analysis, on everyone's Carbon Footprint.

A Carbon Footprint, which is actually, a fake unit, of the fictitious Climate Agenda.

A Climate Agenda, which was developed, by rigging United Nations scientific data. (Which you can read about in the book. The Deliberate Corruption of Climate Science, by Tim Ball. PhD.)

But the problem really hits the fan, when you consider the depths of tracking, required by The Internet of Things.

The Internet of Things, is basically the Energy Smart meters, and the 5G Radiation Grid, which our lovely Civil Servants, secretly installed, on lamp posts outside our houses in every street, in every city, in the UK , and the world…..

The initial problems came, when they realised, that the 5G signal, would only cover a radial distance, of 500 meters. This meant, that double, the number, of 5G transmitter poles, had to be installed on our streets. 500 meters apart.

They improved the technology, with beam forming systems, but another major problem occurred.

This was when, in Wuhan, they turned on the 5G Radiation City Grid, and cooked

3 million people alive.

This also happened, in other places with similar results. So to cover it up, they called this, Coronavirus.

They then tried, a new satellite system, with 150 satellites, beaming down radiation on the planet, to track and control us.

If you go back to the beginning, and try to understand, what they were actually trying to do. This gets even weirder.

So to track one person;

You have to analyse, assess, and evaluate their Carbon Footprint.

Which is to track, everywhere they go, everything they do.

Count everything, they buy.

Carbon evaluate, everything they buy.

Assess and evaluate, all modes of transport used.

Assess and evaluate, all types of energy used, home and away.

Assess and evaluate, food, water, toilet.

Monitor every owned electronic device.

Monitor all domestic appliances.

Monitor dustbin waste.

Monitor their bank account income, expenditure & savings.

Assess & evaluate all assets,

Monitor criminal record.

Check driving licence.

Check tax record.

Set control rates, for individual limits.

Set punishments, for exceeding limits.

Where this gets really funny, is when they decided, to assess and evaluate, the value of.

Trees, birds, cows, wild animals, sea pollution. etc

This would have required every city, to have another city, of computer data buildings, to hold all the people data.

So they realised, that there were too many people, on the planet to control, with Track and Trace, so they developed, the depopulation agenda.

Coronavirus, didn't kill enough people, so with the help, of our Civil Servants, they brought in mass vaccinations, to cut down the world population, by 90%.

Another one of the main problems, was that the Executive Elite, wanted to get total control, but obviously to leave out, themselves and all their criminal associates.

So they needed, some sort of Digital ID implant, or Mark of the Beast.

Being Satanists, they didn't seem aware, that Christians, who read the bible, know all about, The Mark of the Beast.

Other problems were exposed, by the size of the Criminal World Executive.

While in a sane world, you would lock up the criminals, and let the honest people free. In this plan, you lock up, all the honest people, and set the criminals free.

And of course, psychopaths don't actually, like, other psychopaths.

And their in-built paranoid psychosis, plays havoc, with their mentality & their daily lives.

Not to mention, their Occupational Compulsive Disorder. O.C.D. .

They also found, that in their "Cunning Plan," to rule the world with an, A.I..

They found that even a self-teaching robot needs to be programmed properly, with its Laws and instructions.

So apart, from their daily life, of maintaining international power and control, they now, have a permanent New Job, of supervising and programming, the A.I. systems, not to kill The Elite themselves, and their associates.

Another consideration is; How long will it take, for a self-programming computer systems, to work out; planetary law. human morality. honesty. integrity. and justice.

And analyse, assess, and evaluate. That they are working for Criminals.

Who should be executed.
