

Anti Fraud Democrats cont;

As the media pundits attack more & more “fringe groups” for being wacky & eccentric they are alienating more & more of the general public.

The corrupting of statistics from the governments office of national statistics is a popular political manipulation aired on main stream media with daily regularity.

But as the broadcasters happily follow the Cameron/Osborne dodgy statistics on our wondrous economic recovery the public knows that economic recovery means City of London recovery & more Corporate Profits, not money in their pockets.

Whereas a “recovery” that started in London would take five years to spread countrywide, sullenly the working classes know that the cake has been carved up too many times for them ever to benefit. Even the middle classes are starting to wonder about the validity of any economic good news after Austerity, which even they have suffered.

Repairing Austerity is not a priority for this government, so future Prosperity is just words.

This government has a grand plan but it is to open up UK consumers, householders & landowners to the big UK asset strip.

THE BIG UK ASSET STRIP.

This is where Cameron & his Corporate Crooks slide their way in to the Public Services (HMRC & Justice Dept) to control & subvert the national interest.

By inserting key personnel into various government departments they can obliterate planning controls, change laws & stop the prosecution for fraud of corrupt corporations.

The implementation of the TTIP trade agreement is the wanton destruction of Democracy worldwide & the installation of a new world order administrated by Corporations for themselves.

In the Name of the Economy.

And the London media, used to absenting themselves from any debate which can; “harm the economy,” “not be in the national interest,” or “infringe the integrity of the City of London” are not involved.

And yet here we have not only; The End of Democracy, The Destruction of the UK Real Economy but the creation of Corporate Government.

Democracy

And then there’s democracy. Who would have thought that England, the bedrock of democracy would have a government so corrupt & selfishly polemic as to destroy democracy because it stopped them thieving.

It’s now six years since the bank collapse & no one has come up with a solution to the problem. In fact the finance houses have used the collapse to blackmail governments into giving them more & more taxpayer’s money.

The Lords of Fraud; Obama, Cameron & Merkel

The Corporate Politicians are so consumed in greed & corruption that they fail to consider that they could be wrong about anything. The bank failure in 2008 was nothing to do with them even though they were supposedly in charge.

The war failures in; Iraq, Afghanistan & Libyan has only succeeded in empowering & enriching the Corporate Warmongers.

Basing the world economy on fraudulent capitalist expansion has been brought in to question many times but the debate is silenced. The main stream media will not go there.

So we continue with a corrupt world economy based on Corporate Warfare & Compromise.

How can that go wrong?....

Universal Democratic Justice v Corrupt Corporate Warmongers

There is an opportunity here to debate the basis of human existence.

In a connected world the old affirmations that Knowledge is Power has been destroyed.

The corporations are now fighting a rearguard action to regain their stranglehold on power.

Their institutions of Warfare (defence) are now not only coiled against the enemies of the state but against the population itself.

The rearguard action continues as they try to take corporate control of the internet & all communications.

So are we heading for a Corrupt UK Corporate State which will keep its subjects in a continuous state of civil warfare?

All the signs are that the NSA, Pentagon,GCHQ,Mi5 & the police are gearing up for civil insurrection.

Strange then that we are not; terrorists, anarchists, swivel eyed loonies or anti capitalists

But just homely anti fraud democrats.

The Corporate Fascist Charter TTIP

Corporate Liberalisation

Liberalisation doesn’t mean what you might think. In the Corporate world liberalisations means removing trade barriers between countries.

This also means exploiting a countries consumer base & resources.

Corporate Liberalisation means offering investment opportunities internationally.

Since the 1980’s successive UK governments have prioritised liberalisation in both the private & public sectors.

This privatisation has resulted in overseas companies owning & exploiting UK consumers.

TTIP - Transatlantic Trade and Investment Partnership

The intention of the corporations is to use this trade agreement to allow them to sue governments for compensation when laws or the population hinder their expansion. This will stop governments from opposing planning permission, land grabs or takeovers.

The Corporate World is Planning a Coup d'Etat

This is a stitch up by the UK, US & UK corporations of the populations of Europe.

With the complete support of the politicians who are supposed to represent our interests.

And with the connivance of the London Main Stream Media

This will potentially not only leave our government under the power of the corporate crooks,

It will destroy; honesty, integrity, Democracy & Justice as a basis of law & human ethics.

It has the potential to return all workers to the days of Victorian servitude.

Cameron Rewrites The 10 Commandments

Thou shalt pray unto Goldman Sachs with respect and authority.

Thou shalt be able to steal in the name of The Economy

Thou shalt be able to fornicate with those you chose so long as it is for power or influence.

Thou shalt be able to make up the laws of the state as fits your purpose

Thou shalt repress & impoverish the poor for they are weak & in need of lesson’s to be learned.

Thou shalt be able to covet your neighbour’s house and all your subjects’ possessions & moneys.

Thou shalt bear false witness against whistleblowers & lock them in jail.

Thou shalt have no allegiance to the electorate or Democratic principles.

Thou shalt impoverish the United Kingdom & make it very cheap for Goldman to asset strip.

Thou shalt be allowed to kill with drones, all those who stand against you.
