

BIG TECH GOES PSYCHO

Google seem to have stopped any Windows devices from using sim cards for connection. Laptops & Windows phones have been disconnected.

As we are no longer allowed to travel abroad we have been using them more in the UK. The UK coverage is pretty bad & only available in cities & towns.

The objective of the Tech Industry to cover the world in a 5G Radiation surveillance grid seems to have diverted resources & band width from domestic consumers.

This is not helped by Google's war on humanity to restrict us from owning useful high tech devices and harvest all our private data & communications continuously.

The use of beam forming technology appears to be restricted to corporate clients.

There have been 5G experiments in the UK which have aligned with the Pentagon warfare "controlling the human domain" agenda.

Tech Giants now appear to be obsessed in the psychopathic control of Humanity & the use of 5G+ to damage human brains. Western government controllers have also leapt on this with psychotic enthusiasm.

It became obvious that the 5G control grid could not control the whole of Humanity so plans were made to cut the world population by 90%.

The fact that the Tech companies went along with this has not gone down well with the domestic populations.

We now find Tech Giants trying to shut down information on their betrayal of Humanity.

A move that only increases hostility, disgust & will eventually lead to the end of Humanity or the end of the Tech Giants.

Tech Giants have declared war on their customers.

This will not end well.
