

THE FOOD POISONERS

The vaccine is not the only way the KM tried to murder us. They were also trying to kill us by forcing us to eat bugs. Bugs can lead to death (multiple sclerosis, systemic lupus erythematosus (SLE), cancer, etc.

Even beer has been poisoned. In 2016, the Munich Environmental Institute examined the 14 most popular beer brands for glyphosate. It was detected in all of them.

A 2017 study on chitin in insects says it “stimulates the human innate immune system to generate a flood of inflammatory cytokines that damage organs (leading to asthma, atopic dermatitis, etc.) and in persistent situations lead to death (multiple sclerosis, systemic lupus erythematosus (SLE), cancer, etc.)”

Even beer has been poisoned. In 2016, the Munich Environmental Institute examined the 14 most popular beer brands for glyphosate. It was detected in all of them.

In the most extreme case, it was 300 times the legal limit for drinking water. The lowest concentration was found in the Augustiner Helles brand and even that at 0.46 micrograms of per liter was more than four times the 0.1 microgram legal limit for water.

POISON WATER

ATRAZINE WEED KILLER: Has permeated our drinking water. Tests on frogs showed that Atrazine-exposed males were both demasculinized (chemically castrated) and completely feminized as adults. Check your local authority & school to see if they are using ATRAZINE
