DATA HARVESTING

META, Facebook & Cambridge Analitica are famous for harvesting data from Facebook during the 2016 US Presidential election.
But the theft of personal data has got even worse since then.
It is now common place not only for data to be stolen, they are now creating millions of data cities to store our stolen data for the use of AIs & to give Robots our personalities.
Phones & televisions listen, video & analyse the emotions of it's customers & upload your data.

The Tech firms are so good at fraud that The AI embedded in your phone or PC can copy every page of your work & upload it overnight to central control as you sleep.
The Tech Criminals not only ignore THE LAW OF CONTRACT, but have imposed illegal Terms & Conditions to keep your data updated.
