THE PENSIONER REPORT 06/10/2026

The definition of a pensioner in the UK is a person who receives a pension, typically due to retirement from the workforce.

The definition of a Pension is a financialy funded scheme into which amounts are paid regularly during an individual's working career, and from which periodic payments are made to support the person's retirement from work.

A pension can be provided by an employer, a personal pension or a state pension fund.

THE STATE PENSION DECEPTION

When the State Pension was created, people thought they were paying into an investment fund which would get interest, be inflation proof & profit driven.

Various governments over the years have used the State Pension for their own purposes, stealing the pension pot & leaving The State to finance it from incoming taxes.

This left UK pensioners with no interest, no pension assets, no profits & no protection against inflation.

UK Pensioners have the lowest pensions in Europe & we have the most affluent Aristocrat Class.

The State Pension is now described as a "Benefit" by the criminal Aristocrat civil service.

ROAD DESTRUCTION

Pensioners are often described as "Trapped in their Homes."

This has become worse in current years due to the destructive changes to society.

One of these changes is the local council allowing cyclists to use pavements & pedestrian paths.

This has traumatised pensioners & put them in continuous danger.

CYCLISTS

Cyclists are no longer trained ny the police in schools on the Highway Code, road safety or polite behaviour. They do not even have a speed limit.

Pensioners find they have been bullied off pavements, & The Exeter Quay, by bad attitudes.

They occasionally come within a split second of hospitalisation by racing cyclists on blind corners.

Pensioners need exercise to maintain a healthy lifestyle.

Pensioners have also become "Trapped in their Homes" by the council plans for; Smart Cities, C40 Cities, LTN, ULEZ, 15 minute cities & the closing of car parks & parking areas.

Even parks are over-run by racing cyclists....

Changes to Exeter city roads have not improved the flow of traffic & in fact made the City inaccessible.

Councillors & civil servants have their own car parks & free parking cards.

The shut down of roads for cycle use has been an inexplicable aberation for road users.

The building of university student accomodation on car parks has become a regular money laundering scam for the Aristocrat criminals in the public service.

The bus service does not have the roads or the right buses for a proper service.

In Spain taxis are subsidized and cost £5 for within the city & £10 to the next town.

Locals have even been stopped from using the Exeter canal for reacreational boating as the facilities & car parks have been donated to Exeter University...#bribes

EXETER CITY COUNCIL

Exeter Council have created a no go area in Exeter City Centre.

Parking charges have been doubled, car parks closed & street parking shut down.

Public Servants have their own car parks & free parking cards.

THE EXETER SANCTUARY CITY

The Exeter Sanctuary City has promised housing for migrants before locals.

The city centre has been transformed from a country tourist attraction into blocks of international student flats & restaurants full of Lab Meat in different flavours.

The clothing shops are so bad that people now buy their clothes in Spain while on holiday.

The 15 minute city plan has become another trap for residents as pubs are shut down & basic healthy restaurants are inaccessible.

The social cohesion in Exeter was destroyed by the Lockdown & Covid track'n'trace frauds.

The Exeter Aristocrat public servants have built their own LGBTP swimming pool, health spa & gym,

St Sidwell's, only a few minutes walk from their offices in Paris Street.

Just right for a free lunchtime dip.

No parking for pensioners though.
